

Weighty matters: Management options for the obese patient

Overview

This webinar will summarise the endocrine effects of weight gain and loss, explain why some patients are more suited to weight loss surgery than others and discuss the impact of obesity on health and mental function.

Topics | Speakers

Pathophysiology of obesity, Dr Shannon McCarthy, Endocrinologist

Indications for weight loss and metabolic surgery - who should have it? Mr George Kalogeropoulos, Bariatric and Upper GIT Surgeon

Obesity and mental health conditions, Ms Rebecca Van Lloy, Psychologist

Learning Outcomes

1. Explain the pathophysiology of weight gain and weight loss.
2. Identify which patients to refer for weight loss surgery.
3. Identify and implement a recall system for patients who have undergone weight loss surgery.
4. Recognise the comorbid symptoms in the obese patient such as mental health conditions.
