GP EDUCATION PROGRAM – Webinar Event

ORTHOPAEDIC CASE STUDIES IN SHOULDER, HIP AND KNEE: DIAGNOSIS AND WHEN TO REFER

OVERVIEW

This webinar will include the presentation of five common orthopaedic conditions in general practice, providing an insight into diagnosis, initial management and guidance for referral of specialist opinion.

TOPICS | SPEAKERS

SHOULDER case studies with *Mr Douglas Li, Orthopaedic surgeon*

The diagnosis is often clear from a thorough assessment. Understanding the natural history will dictate your management and influence the outcome

Case 1: Pseudoparalysis after a fall

Case 2: Popeye deformity of the arm

HIP case studies with *Mr James Stoney, Orthopaedic surgeon*

Diagnosis and treatment of different labral tears. Diagnosis and management of lateral hip pain

Case 1: Groin pain - labral tear

Case 2: Lateral Hip Pain – Gluteal tendinopathy

KNEE case study with *Mr Chris Kondogiannis, Orthopaedic surgeon*

Recognise the common causes of Traumatic Haemarthrosis, aids to diagnosis, initial investigations and management.

Case: Traumatic Knee Haemarthrosis

LEARNING OUTCOMES

- 1 Discuss the assessment and management of patients presenting with pseudoparalysis after a fall
- 2 Outline the appropriate treatment for popeye deformity of the arm
- 3 Differentiate between the different types of labral tears and identify when a labral tear needs referral for repair
- 4 Discuss the diagnosis and management of lateral hip pain
- 5 Identify the common causes of Traumatic Haemarthrosis and outline a management plan
