

Epworth GP Education

A GPs guide to anticancer therapy toxicity and management

WEBINAR PROGRAM

DATE Tuesday 30th August 2022

TIME: 7pm – 8.15pm

SPEAKERS/TOPICS

A GPs guide to anticancer therapy toxicity and management

1. Side effects and management of chemotherapy toxicities

Presented by Dr Zhen Rong Siow, Oncologist

1. Immunotherapy and targeted therapy

Presented by A/Prof Phillip Parente, Oncologist

Moderator: A/Prof Joseph McKendrick, Oncologist

OVERVIEW

This GP education webinar is hosted by Epworth Healthcare and moderated by A/Prof Joseph McKendrick, Oncologist

Cancer management has undergone a transformation with respect to treatment and outcomes as a result of personalised therapy with targeted therapy and immunotherapy. With these new treatments a unique set of toxicities have emerged impacting on the patient experience. These range from the common to the rare in incidence. As the durability of response has significantly improved over the last decade, an understanding of these emerging toxicities along with the management and impact on quality of life is important for GPs and their patients.

The presentation will include the opportunity for panel Q&A.

LEARNING OUTCOMES

1. Discuss the treatment and management options available for toxicity caused by chemotherapy
2. Discuss the treatment and management options available for toxicity relating to immunotherapy and targeted therapy

REGISTRATION

REGISTER HERE or visit <https://www.epworth.org.au/for-gps>

Registration requirements:

- First name and surname
- RACGP or ACRRM number
- General Practice name, suburb and postcode
- Occupation
